## MOSQUITO CONTROL PROGRAM – KANATA NORTH

Weekly report –May 5<sup>th</sup> to May 11<sup>th</sup>, 2024

1

### *MONITORING and WEATHER*

---

**Accumulation of water:** total of 25,1 mm

**Date of precipitation:** Mainly on May 5<sup>th</sup> and May 8<sup>th</sup>

**Is there presence of larvae on the field?:** Yes  No

**Note:** Larvae development and late hatching continue in some sites.

### *TREATMENT*

---

**Was there a treatment?:** Yes  No

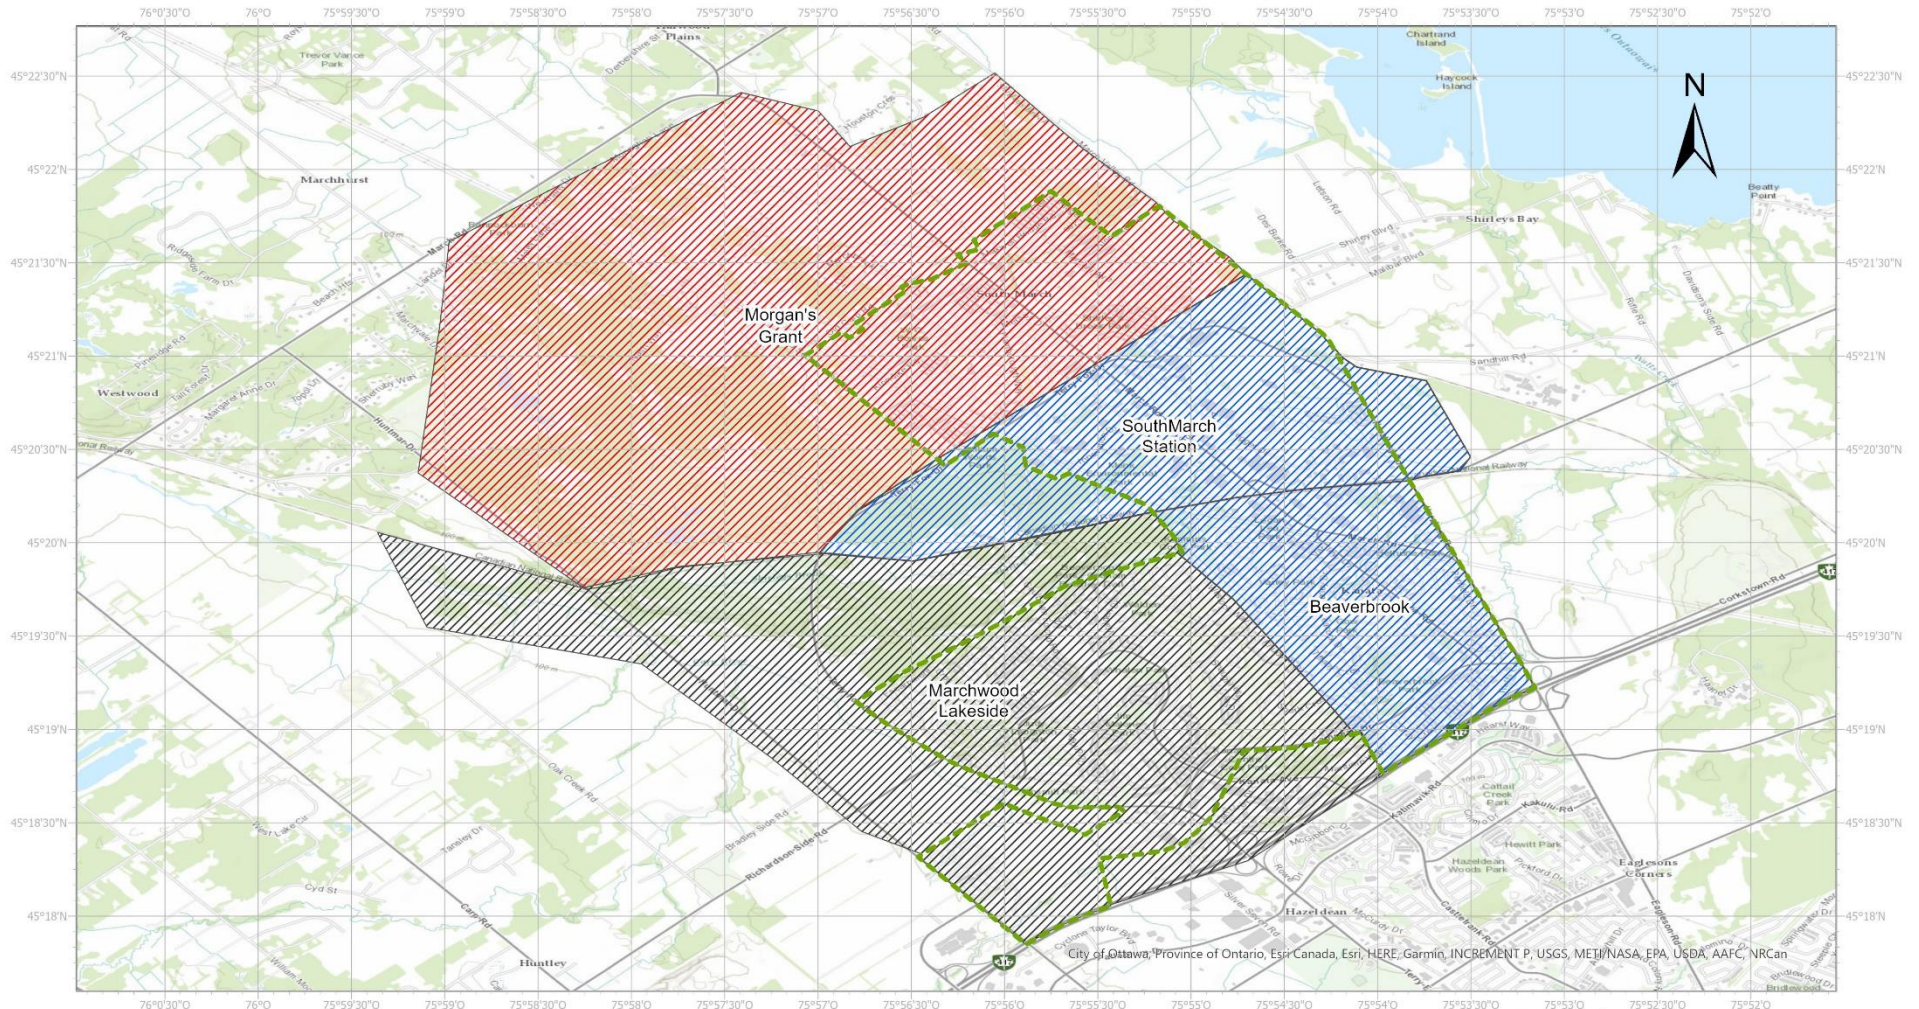

**Type of treatment:** Ground  Aerial

**Date of treatment:** A second treatment for the season has begin on May 6<sup>th</sup> (see the map below). Aerial treatment has been done in Morgan’s Grant area. Ground treatment as been done in South March Station and Beaverbrook area. Ground and aerial treatments have been done in Marchwood Lakeside area.

Since mosquitoes can fly up to 2 km, (even more in some circumstances), it is important to mention that treatments done in one area reduce nuisances for all the protected aera in Kanata North, not only the area treated.
