FORECAST

Forecast for next week (June 1st to June 7th):

Following the weekend's precipitation, we might see some larval hatching in the coming days. The water level of the Carp River is also currently rising, which could create suitable conditions for a new treatment in that area.

Possible treatment: Yes ☒ No ☐

If yes:

Type of treatment: Ground ☒ Aerial ☒

Date of planned: The treatment's start date will depend on the observed larval hatching, potentially between June 2nd and June 4th.
